

## UPDATE 2009

**As promised, the following is information relevant to all classes that will run in Tasmania this year. It covers all open events including rounds of the Statewide Series.**

**All events will be run under the 2009 AKA Manual. It will be circulated to licence holders towards the end of January, however until such time that hard copies are received, it will be available on the Australian Karting website from the third week of January. Access will be available at the early race meetings.**

**Over 40's J will run at 140 kg and 160kg.**

**Cadets in lieu of Midgets will run as previously explained.**

**Junior Clubman will run as per the 2009 Manual however, at selected events and dates, some parity testing of Junior Max engines will be conducted as a precursor to possible changes in 2010 and beyond. The SKC will organize and conduct these tests.**

**The decision on the TAG class and the use of tyres has been delayed until after Burnie. There are only a handful of entries for Burnie so they will run as Leopard and Rotax on their own tyres but on the track at the same time. This will enable more input from the actual drivers and further discussion on their future and growth of the classes.**

**If you have any questions what-so-ever please call Steph on 0418130691**
